PREFACE

The **2011 Missouri Property & Casualty Supplement Report** presents data collected by the Department of Insurance, Financial Institutions & Professional Registration from companies that file supplements to the Page 19 of the annual statement for Missouri for 2011. This form is used to collect data in greater detail than reported in the 2011 Annual Statements. All property and casualty companies are required to complete this form per 20 CSR 200-1.037,  374.040 RSMo., and  374.045 RSMo.

The enclosed documentation, by company, provides information for each line of business specified on the Supplement to Page 19, with company profiles listed by their market share ranking. Charts have been included in this publication for each line of business. The first chart shows the total market share of the top 5 and top 10 companies, for the last five years. The second chart shows a total loss ratio, by line of business, for the last five years.

This publication also includes Historical Trends, By Line of Business. This section provides historical data, by line of business, for the last ten years.

While every effort has been made to assure that all significant errors and omissions in the supplement data have been identified and resolved, the accuracy of the report depends on the accuracy of the information filed by each company.

Explanation if premiums are reported, but no insureds: _____

DEFINITION OF TERMS

Market Share: The dollar amount of direct premiums written by company divided by the total amount of direct premiums written industry-wide for the particular line of business being analyzed, expressed as a percentage.

Direct Premiums Written: The dollar amount charged when a policyholder contracts for insurance coverage before reinsurance has been ceded and/or assumed.

Direct Premiums Earned: The part of premium attributable to the coverage already provided in a given period before reinsurance has been ceded and/or assumed.

Direct Losses Paid: The sum of all payments made during the year for the benefit of insurance claimants, before reinsurance has been ceded and/or assumed. These payments include amounts paid in the current year for claims arising from coverage in prior years and exclude amounts which will be paid in future years for claims arising from the current year. Hence, this item is not a measure of the actual cost of current coverages, but only of current cash flows.

Direct Losses Incurred: The sum of direct losses paid plus an estimate at the close of the year of the amounts to be paid in the future for all claims arising from the current and all prior years, minus the corresponding estimate made at the close of business for the preceding year. Incurred losses reported include estimated amounts unpaid for incurred-but-not-reported (IBNR) claims.

Loss Ratio: The dollar amount of direct losses incurred divided by the dollar amount of premiums earned for the particular line of business being analyzed, expressed as a percentage. This is an accounting representation of the portion of each premium dollar which is needed to honor a company's promise to pay claims.

Cash Flow Loss Ratio: The dollar amount of direct losses paid divided by the dollar amount of premiums written for a particular line of business being analyzed, expressed as a percentage.
